Subj: OFFICER TRAINING GOALS FOR 1ST QUARTER 2001

Ref: (a) CSL/CSPINST C3500.1A

- 1. The following training goals are set for 1st Quarter 2001:
 - A. Improve ship's ability to operate in shallow water, high contact density environments. This will be accomplished by the following:
 - (1) Lectures on shallow water operations.
 - (2) NSTCPAC trainers focusing on these operations.

Measures of Effectiveness:

- (1) Improved proficiency of the officers in operating in shallow water trainers.
- (2) At least a 3.0 average on exam questions in these areas.
- B. Improve proficiency in conducting initial detection maneuvers. This will be accomplished by the following:
 - (1) Lectures on IDMs.
 - (2) Conduct of alertness drills on OODs at sea.

Measures of Effectiveness:

- (1) Improved proficiency of the officers in conducting IDMs.
- C. Obtain a high level of knowledge in line handling, an area typically weak for officers. This will be accomplished by:
 - (1) Lectures on this topic.
 - (2) Observation of line handling evolutions.

Measure of Effectiveness:

(1) Performance on written exams.

Tab 20

- D. Obtain a high level of proficiency in ADCAP torpedo employment, to include a thorough knowledge of torpedo presets, milestones, and wire guide commands. This will be accomplished by:
 - (1) Lectures on this topic.
 - (2) Use of the ADCAP Post-Launch Trainer program.

Measure of Effectiveness:

(1) Performance on written exams.

(2) Performance using Post-Launch trainer as evaluated by the CO/XO.

Subj: OFFICER TRAINING GOALS FOR 2001

Ref: (a) CSL/CSPINST C3500.1A

- 1. The following annual goals are set for training in 2001:
 - A. Improve tactical employment of the ship in the areas of tracking and approach and attack for the upcoming WESTPAC deployment. This will be accomplished by:
 - (1) Lectures on tactical ship employment.
 - (2) Attack centers.
 - (3) Evolutions including AOBT problems, strike exercises and at-sea tracking exercises.
 - B. Improve tactical employment of the ship in high contact density environments. This will be accomplished by:
 - (1) Lectures on ship employment in high contact density environments.
 - (2) Attack centers simulating high contact density environments.
 - (3) Evolutions including AOBT problems, strike exercises and at-sea tracking exercises.

OFFICER TRAINING ASSESSMENT FOR 2000 Subj:

Ref: (a) CSL/CSPINST C3500.1A

1. Training for the year 2000 was evaluated as satisfactory. All training topics were conducted and the primary training goal was met.

A. Goal: Improve tactical employment of the ship in the areas of tracking, approach and attack, and strike in preparation for both upcoming WESTPAC deployments.

Degree of Accomplishment: This goal was met. The ship's excellent performance on this year's Tactical Proficiency Exam (overall grade Above Average) indicated that the ship obtained a high degree of tactical proficiency in the areas of submerged ASW and ASUW, as well as Strike Warfare. The AOBT system was used to verify the proficiency of OODs in both reactive attacks and initial detection maneuvers. The ship participated in numerous KILO Exercises in the first half of the year. Attack centers were utilized throughout the ship's SRA to ensure that basic tactical proficiency was maintained during the long inport period.

[(B)(3)] (B)(6)

LT USN

From: Navigator

Commanding Officer To:

Executive Officer Via:

Subj: OFFICER TRAINING ASSESSMENT FOR 4th QUARTER 2000

(a) CSL/CSPINST C3500.1A Ref:

1. Training for the fourth quarter is evaluated as satisfactory. All training topics were conducted and the training goals was met as follows:

A. Goal: Obtain an extremely high level of knowledge and proficiency in shallow water operations, moving havens, and various other topics contained in OPORD 201.

Degree of Accomplishment: This goal was not met. Extensive training was held on these topics with a special emphasis on shallow water operations. Test results were not indicative of an increased level of knowledge in these areas (2.5) average). Due to the ship's SRA, no at-sea simulation of shallow water operations was conducted. This topic will be rolled into 1st Quarter 2000.

B. Goal: Obtain a high level of knowledge in line handling.

Degree of Accomplishment: This goal was partially met. Lectures on line handling were useful in increasing the level of knowledge of officers in this area. Because the ship was in drydock much of the quarter, minimal practical training could be conducted. This topic will be revisited at a later date.

C. Goal: Obtain a high level of proficiency in ADCAP torpedo employment, to include a thorough knowledge of torpedo presets, milestones, and wire guide commands.

Degree of Accomplishment: This goal was partially met. Lectures on ADCAP employment were conducted and test results were encouraging (3.5 avg) but the ADCAP Post-Launch trainer was under-utilized. This topic will be covered in 1st Quarter 2001. [(B)(B)] >

COMBAT SYSTEMS LONG RANGE GOALS 2001

LONG RANGE GOAL ONE: Improve the Combat Systems response to Conventional Weapons casualties. Response to torpedo casualties such as hot run, Otto fuel spill, TM dimer spill, unrestrained weapon, data link failures, fire in the torpedo and sonar will be emphasized throughout the year. This goal supports the ships goal of casualty response will be accomplished using the following training events:

- (1) Lectures will be given on immediate and supplemental actions for weapons department casualties.
- (2) Walkthroughs will be conducted on actions for properly fighting weapons department casualties.
- (3) Monitored evolutions and drills for reinforcement of department member casualty actions will occur.

LONG RANGE GOAL TWO: Improve Weapons handling, focusing on safety and efficiency. In early 2001, the department will focus on loading and offloading weapons from the pier. Later in the year, focus will be on torpedo handling in the torpedo room. This goal will be accomplished using the following training events:

- (1) Lectures will be given on weapons handling, emphasizing OD44979 procedures and procedural compliance.
- (2) Walkthroughs and actual torpedo handling evolutions will be conducted in the torpedo room. Actions will be carried out fully in timed scenario to maximize training benefit.
- (3) Evaluations will be conducted during actual weapons onload and offload, by external monitors as opportunity arises.

CO

[(b)(3)/(b)(c)],

COMBAT SYSTEMS SHORT RANGE 1st QUARTER 2001 GOALS

SHORT RANGE GOAL ONE: Continue to increase Combat Systems Department response to Conventional weapons Casualties, emphasizing hot run, otto fuel spill, sonar fire, and fire in the Torpedo room. This goal supports the ships goal of increased casualty response, and will be accomplished by using the following training events:

- (1) Lectures will be given on immediate actions and supplemental actions for 1) Hot Run in the Torpedo Room 2) Otto Fuel Spill in the TR 3) Fire in the Torpedo Room and 4) Sonar/Fire Control equipment fires.
- (2) Drills/Walkthroughs will be conducted to improve response times and actions for properly fighting weapons department casualties, emphasizing fires.

<u>Measure of effectiveness:</u> The following methods will be utilized for evaluating success in accomplishing the goal.

- (1) Evaluated drills/walkthroughs will be conducted for reinforcement of department members' casualty actions.
- (2) Examinations will be given to gauge department member's knowledge of the casualty control procedures. Members should score an average of 3.0 on these examinations.

SHORT RANGE GOAL TWO: Continue to maintain high standards with respect to weapons handling. This goal supports the CS long term goal of safe weapons handling, along with the safety standown by CSP and CSS, and will be supported by the following training events:

- (1) Lectures will be given on weapons handling safety, conventional ordance certification, weight test records, and prior to use inspections.
- (2) Walkthroughs along with actual weapons handling will be conducted to maintain high weapons handling standards.

<u>Measure of effectiveness:</u> The following methods will be utilized for evaluating success in accomplishing the goal.

(1) Evaluated weapons handling/walkthroughs will be conducted for reinforcement of lectures on weapons handling.

Subj: NAV/OPS DEPARTMENT TRAINING GOALS FOR 2001

Ref: (a) CSL/CSPINST C3500.1A

- 1. The following annual goals are set for training in 2001:
 - A. Prepare department personnel for the upcoming WESTPAC deployment, specifically in the area of safe navigation in high contact density environments. This will be accomplished by:
 - (1) Lectures on navigation and tactical operations with an emphasis on high contact density situations.
 - (2) SPAN and other off-ship trainers.
 - (3) Monitored evolutions and drills.
 - B. Improve cross-rate level of knowledge and qualifications. This will be accomplished by:
 - (1) Lectures on topics required for cross-rate qualification.
 - (2) Rotating personnel between different watch stations during normal at-sea periods and during training evolutions.

[(b)(3)/(b)(6)]
